A CRM APPLICATION FOR THE CHAI SHOP & CO

2. REQUIREMENT ANALYSIS

2.1 Project Overview

Requirement analysis defines what the CRM Application for the Chai Shop & Co must provide and the quality characteristics it should maintain. The system is designed around Salesforce Lightning, custom objects, validation rules, relationships, reports and dashboards.

2.2 Functional Requirements

ID	Requirement	Description
FR-1	User Authentication	Provide secure access to authorized users.
FR-2	Customer, Product, Order and Staff Management	Create, maintain and manage records for the four main custom objects.
FR-3	Data Entry and Validation	Capture required information and validate entered values.
FR-4	Relationship Mapping	Connect customers with orders and products with orders using Salesforce relationships.
FR-5	Report Generation	Generate reports for customers, products, orders, staff, sales and business information.
FR-6	Dashboard Visualization	Display important information using dashboards and visual analytics.
FR-7	User Role Management	Control access according to user roles, profiles and sharing configuration.

2.3 Non-Functional Requirements

Category	Requirement
Usability	Provide a simple Salesforce Lightning user interface.
Security	Use profiles, roles and sharing controls for access management.

Reliability	Use cloud storage and platform capabilities to reduce the risk of data loss.
Performance	Target report/query generation and loading within approximately 3 seconds.
Availability	Provide cloud-based access for authorized users.
Scalability	Support growth in customers, products, orders, staff and business coverage.

2.4 Data Flow Diagram (Logical Flow)

User → Salesforce Lightning UI → Customer/Product/Order/Staff Custom Objects → Validation Rules → Object Relationships → Reports → Dashboards.

2.5 Technology Stack

Layer	**Technology**
Frontend	Salesforce Lightning UI
Backend/Application Platform	Salesforce Platform
Database	Salesforce Cloud
Automation/Validation	Salesforce Validation Rules and automation capabilities
Analytics	Salesforce Reports and Dashboards

2.6 Main Data Entities

- Customer: stores customer identity, contact and preference information.
- Product: stores chai and food item details, category, price and availability.
- Order: stores order details, selected products, quantity, total amount and customer relationship.
- Staff: stores staff details, role, contact information and responsibilities.

2.7 Requirement Summary

The requirements establish a centralized, secure and cloud-based CRM system with structured customer, product, order and staff data management, validation, relationships and analytics. These requirements guide the design and implementation phases.
