6. PROJECT TESTING

6.1 Testing Objective

Testing verifies that the CRM Application for The Chai Shop & Co. functions according to its requirements and that customer data, order relationships, validation, security and analytics behave as expected.

6.2 Test Areas

Test ID	Area	Expected Result	Status
TC-01	Customer Record Creation	Customer record can be created with required information.	Tested
TC-02	Order Record Creation	Order record stores customer, order and relevant details correctly.	Tested
TC-03	Feedback Record Creation	Customer feedback can be created and stored correctly.	Tested
TC-04	Interaction Record Creation	Customer interaction details can be stored and linked correctly.	Tested
TC-05	Mandatory Field Validation	Required fields prevent incomplete customer and order records where rules apply.	Tested
TC-06	Contact Validation	Customer contact information is checked according to configured validation rules.	Tested
TC-07	Order Data Validation	Order values and required order information are checked against configured rules.	Tested
TC-08	Field Dependency	Relevant choices respond correctly to the selected customer or order information.	Tested

TC-09	Relationship Testing	Customer, Order, Feedback and Interaction relationships display connected records.	Tested
TC-10	Security Testing	Configured profiles and roles provide appropriate access.	Tested
TC-11	Sharing Rules	Records are visible/editable according to configured sharing rules.	Tested
TC-12	Reports	Reports display relevant customer, order and interaction records and calculated information.	Tested
TC-13	Dashboards	Dashboard components reflect available CRM report data.	Tested
TC-14	Performance	Queries/reports are checked against the target of approximately less than 3 seconds.	Checked

6.3 Validation Testing

Validation testing covers mandatory fields, customer contact details, order information and applicable data-entry rules. The purpose is to prevent incomplete or invalid CRM records from being accepted.

6.4 Security and Access Testing

Security testing covers profiles, roles and sharing rules. The system is checked to ensure that Shop Manager, Shop Staff and System Administrator access follows the configured permissions.

6.5 Analytics Testing

Reports and dashboards are checked for correct display and updates based on the available customer, order, feedback and interaction records.

6.6 Testing Conclusion

The testing phase covers the core customer data, order, validation, relationship, security and analytics areas of the CRM Application for The Chai Shop & Co. The documented test areas provide evidence that the implementation has been reviewed against the project requirements.
